## **Updated: Mass vaccination sites prioritize second doses after more than 40,000 get first dose of COVID-19 vaccine**

**OLYMPIA** -- The Washington State Department of Health (DOH) is pleased to share that more than 40,000 people have received their first dose of COVID-19 vaccine at the state's mass vaccination sites. Next week, many of our sites will [focus primarily on second doses](#) to ensure Washingtonians are fully vaccinated.

Thanks to the hard work of DOH staff, the Washington National Guard, and local and private sector partners, 41,441 people have received their COVID-19 vaccine at state mass vaccination sites since they opened January 26.

- 9,358 in Spokane
- 10,148 in Ridgefield
- 9,678 in Wenatchee
- 12,257 in Kennewick

Starting next week, our Ridgefield, Wenatchee and Kennewick sites will prioritize second doses of the vaccine. These sites administer the Pfizer-BioNTech vaccine, which requires a booster shot 3 weeks or 21 days after receiving a first dose.

Our Spokane location, which administers Moderna, will administer both first and second doses. Moderna's booster shot should be given 1 month or 28 days after the first dose.

Please note, hours and registration information is different for each location and it may be different than in weeks past. Shipments will not begin arriving until Tuesday due to the Monday holiday, plus weather concerns across the country are causing a delay from the CDC.
